Patient Information

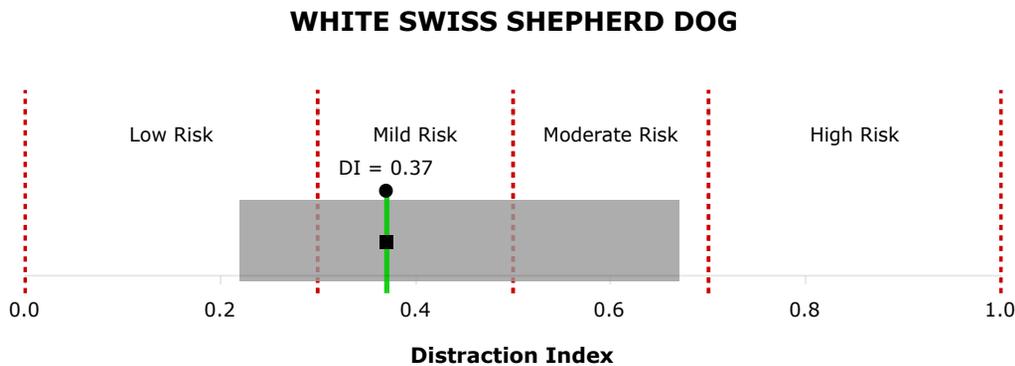

Client: Garfias, Sydney Patient Name: Atari Reg. Name: Atari Kobayashi of Moro PennHIP Num: 128447 Species: Canine Date of Birth: 10 Jun 2018 Sex: Male Date of Study: 25 Mar 2019 Date of Report: 27 Mar 2019	Tattoo Num: Patient ID: 37257 Registration Num: Microchip Num: 985000005844286 Breed: WHITE SWISS SHEPHERD DOG Age: 9 months Weight: 62 lbs/28.1 kgs Date Submitted: 25 Mar 2019
--	---

Findings

Distraction Index (DI): Right DI = 0.37, Left DI = 0.35. Osteoarthritis (OA): No radiographic evidence of OA for either hip. Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.37.
 OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.
 Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 55 canine patients of the WHITE SWISS SHEPHERD DOG breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.22 - 0.67) for the breed. The breed average DI is 0.37 (solid square). The patient DI is the solid circle (0.37).

SUMMARY: The degree of laxity (DI = 0.37) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
